

# STRIKE FOR SMALLER CLASSES

For less work and better education! We demand a collective bargaining agreement “workplace health protection” which would regulate class sizes. Smaller classes are also better learning environments for your children.

# SMALLER CLASSES – LESS PRESSURE FOR EVERYONE

Dear parents,

Quality education is only possible with good working conditions for school staff. We know that the one-day strike is a burden to parents and children. Thank you for your support and your solidarity. Smaller classes protect the health of school staff and contribute to better learning conditions for children. A collective bargaining agreement to decrease class sizes would benefit both teachers and students.
